# FOR A BEAUTIFUL LAWN PLANT

#### MAYO'S LAWN GRASS

Mayo's Lawn Grass is mixed especially for this section of the country. It is made of a base of extra fine Kentucky Blue Grass and White Dutch Clover, with enough quick growing grasses to protect the slow growing Blue Grass while it gets a start. These quick growing grasses also give you a green lawn before you could get one with Blue Grass alone. One pound of Mayo's Lawn Grass sows 300 square feet of bare ground.

35 cents per pound, or 33 cents per pound in 10 lots or more

### MAYO'S SHADY LAWN GRASS

This grass is a mixture of grasses particularly adapted to grow in the shade or in acid soils where it is impossible to get a stand

of Blue Grass and White Dutch Clover. Mayo's Shady Lawn Grass looks very much like a Blue Grass Sod, and has no coarse grasses to keep it from making a beautiful lawn.

60 cents per pound

#### MAYO'S RYE GRASS

This is one of the fastest growing grasses for lawn use. It will stay green up until the later part of June, and if watered well it will last longer. It may be used all Spring to produce a quick stand of grass. Sown at any time after the first of September it will give a bright green lawn all winter.

15 cents per pound
